

Whose slides are these?

In 2023, several boxes of 35-millimetre transparencies (slides) of the Tararua Range were found in the attic of a house in Johnsonville, Wellington. All are labelled, but they are undated and the people in them are mostly unnamed.

The huts, bridges and cars shown suggest that the slides were taken in the 1950s.

Scans of some of the more interesting photographs follow, with their original captions. Dates, where known, have been added.

Who was the photographer?

Who are the people in the photographs?

1. Looking out of truck

Taken from the back of a truck travelling north on the Hutt Road, probably on the way to the Tararuas, this suggests that the photographer belonged to a Wellington-based tramping club.
